

Internship/full-time position: Equity Research Associate

New Street Research – Technology Infrastructure

Our Background

New Street Research is the premiere independent research boutique focused on the Telecommunications and Technology sectors globally. We partner with the world's leading investment institutions to bring them unique insights and ideas that will guide their investment decisions. We have offices in London, New York, and Singapore.

Our Technology Infrastructure team started operations in 2018, covers some of the most exciting tech names (Tesla, Apple, Uber, SoftBank and the Vision Fund, Intel, Nvidia, AMD, and many others), and is expanding fast.

We want to add to the team talented research associates, passionate about technology, passionate about investment research, and willing to contribute and learn in a fast-paced and successful team.

Job description
