About the Summerschool

34 Students from 8th grade onwards spend two or three weeks of their summer holidays on board of the threemast topsail schooner “Thor Heyerdahl”.

The students aged 13-17 years take on responsibilities regarding everyday life on board and receive project-based English lessons on a daily basis. An expedition by rubber dinghy and on foot abroad is also part of the trip. The language spoken on board is English.

The Summerschool aspires to challenge and to advance young people concerning their personal and social skills, to improve their English language skills, and to offer an insight into sailing on a traditional vessel.
