We are looking for a

**Student Employee / Intern (remote)**

(Reference number: job-2023-01)

**Who we are**

RowSquared is a company with a dedicated team rooted in international development, large-scale data collection, and data science. Our mission is to craft digital tools and strategies that elevate how our clients engage with data. Collaborating with international organizations such as the World Bank, UNICEF, IFAD, UNFPA, and FAO, as well as National Statistical Offices, we specialize in developing modern visualizations, delivering comprehensive analyses, and introducing innovative data sourcing and monitoring solutions. Our efforts empower these organizations to fully leverage the potential of their data.

**Your responsibilities**

We foresee that you will be involved in the following tasks:

- **Research design**: Conduct literature reviews, identify and analyze secondary data, and assist in drafting data analysis plans.
- **Survey preparation**: Design questionnaires, script for Computer-Assisted Personal Interviewing (CAPI), and develop training materials for enumerators.
- **Field monitoring**: Establish data quality checks and monitor to ensure data quality during data collection phase.
- **Data analysis**: Clean datasets for accuracy and consistency, perform preliminary data analyses, and contribute to reports.
- **Social media management**: Contribute to a communication strategy, especially for social media, and write respective posts.

Your exact responsibilities might evolve over time.

**What we offer**

You will be an active team member and will

- Gain hands-on experience in working for international organizations.
- Collaborate with experienced professionals in the field of data science and surveys.
- Improve your skills in data collection, analysis, and report writing.
- Get an understanding of the workings of international development projects.
Position overview

- Duration: Up to 6 months, starting as soon as possible
- Type: Part-time, up to 15 hours per week
- Location: Remote (home-based)

The exact conditions for your contract as well as remuneration will be determined based on your situation.

Your qualifications and skills

- You are a Master student or recent graduate in Economics, Sociology, Data Science, Statistics, International Development, or a related field.
- You are confident in utilizing STATA for data analysis and related tasks. Familiarity with either R or Python would be a significant advantage.
- You ideally have experience with Survey Solutions and other CAPI tools.
- You have strong written and verbal communication skills.
- You are familiar with different social media and adept at their use.
- You are able to work independently and collaboratively in a team.
- You have an excellent command of English; knowledge of Portuguese is an advantage.

How to apply

Please send your CV by email to jobs@rowsquared.com, mentioning the reference number job-2023-01 in the subject. Questions can also be addressed to this email address. The position will be filled as soon as a suitable candidate is identified. You can find out more about RowSquared at www.rowsquared.com.
