

# Internship Programme

## DeustoTech

The University of Deusto is offering **places for research stays** for undergraduate, master's degree and/or PhD students, in various projects of [DeustoTech](https://www.deusto.es/en/home/international/students) Technological Institute.

DeustoTech focuses its activity on the development of projects, both collaborative at **national and international level**, in partnership with strategic companies across **six major application sectors: Industry, Mobility and logistics, Energy, Circular Economy, Health and Societal Challenges**. The research staff is integrated in 7 research teams, 6 of them accredited as high performance research groups by the Basque Government.

The research stays will be framed as **internships**, allowing students to receive the **Erasmus + grant** from their home institution.

Detailed information on the different projects, requirements and the application process can be found in the following link: <https://www.deusto.es/en/home/international/students>

The call will remain open permanently until further notice.

We would appreciate it if you could disseminate the information among your students.

We remain at your disposal for any further information please contact:
