

R-Clinic

Wissenschaftliches Arbeiten

Oli's Data Lab is a place where you can get support with statistical methods and their implementation in R. The offer is aimed at students at the University of Mannheim who are enrolled in the Master's Program in Political Science and who are working on a quantitative project for either a term paper or their MA thesis.

The lab is open to students who have small technical problems that can be quickly solved as well as to students who feel a more general insecurity towards their projects and wish multiple consultation sessions. Among other aspects within your projects, I am happy to support you with

- technical support with R (Data-preprocessing, implementation of a specific statistical model, creation of graphs...)
- Choice of an appropriate analysis strategy (e.g. choice of an appropriate statistical model)
- Interpretation and write-up of results
- Identification of relevant and helpful methodological literature
-

Please note that availability of consultation sessions is limited. The earlier you contact me, the higher the chances that I can give you all the support that you need.

If you would like to seek my support, please fill out the following form:

<https://forms.gle/fRVrdq4QFjyp1CPA6>

If you have any further questions, do not hesitate to write me an e-mail at orittman@mail.uni-mannheim.de. I am looking forward to learning about your projects.
