Further comments regarding the course:

- Great course. Obviously, it has to be seen in connection to the tutorial!
- Professor Gschwend is very nice and helpful. He always encourages students to raise questions and think hard. I enjoyed taking the class, although the workload of the course is pretty high.
- The workloard corresponding to all homeworks in total was not appropriate for 2ECTS; Maybe one could rather combine both courses (Lecture & Lab) to 8 ECTS and equally weight HWs and Final Paper with each 4ECTS.
- Very good instructor, who takes the time for his students and try as good as possible to break down the knowledge in understandable pieces. Also he encourages students to think critically about research papers and prepare them therefore for an academic life.
- Very well organised course, providing us students with the tools to learn statistics in the future. Both Prof. Gschwend and Marcel are excellent instructors.

In general, when I joined QM I had very little experience with statistics (e.g. had to again learn what the difference between the mean and median is). After taking both QM and AQM I have established a fundamental understanding of statistics and feel empowered to learn more about statistics in the future.
